

# RC09

## CLUB RACER

**COMPOUND** RC09 HYPER CARBON  
**ROTOR TEMP** 300-800°C  
**FRICITION** 0.42-0.55μ

RC09 Club Racer is the new pad from Project-Mu for club racing enthusiasts with seriously fast cars. It is the pad to use when your car spends a majority of its time on the track or in a rally at anything up to full professional motorsport.

The flagship pad in the Project Mu lineup, the RC09 pad compound is based on the DNA of PMU Racing Division's ultra successful H16-03 motorsport pad, which is one of the world's best race pads today.

This pad really punches above its weight and will outperform many expensive race pads in many race and rally applications.

Available in all shapes and thickness, for Japanese, European, Australian road calipers right through to GT3's and Gallardo's!

A full range of motorsport shapes are also available for AP, Alcon, Brembo, Wilwood etc
