

NS400

STREETSPORT

COMPOUND CARBON NS
ROTOR TEMP 400°C
FRICITION 0.37-0.40 μ

The NS400 Brake Pads by Project Mu are developed for high performance and street duty for most popular automotive applications.

A must for any vehicle that has increased horsepower & modifications, this street sports pad provides a considerable braking performance increase over standard factory equipped brake pads.

The NS400 provides outstanding initial stopping power, and is asbestos-free. The NS400 also exhibits excellent low dust and squeal properties.

Available in all shapes to suit Japanese, European and Australian cars.

NS400 is a Popular pad for:

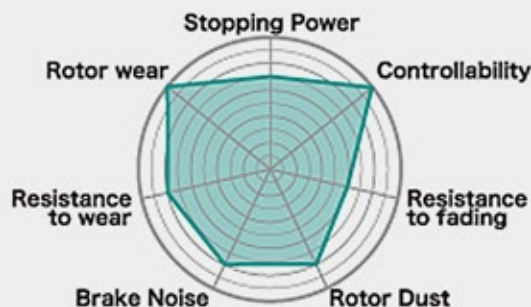

Nissan Silvia, Skyline GTS, 350z, 370z
Mazda 3 MPS, Mazda 6, RX7, RX8,
Mitsubishi Lancer, Ralliart Colt, FTO,
Subaru BRZ, Impreza, Forester, Liberty,
Ford Focus XR5, Falcon XR6/XR8, Holden
Commodore, VW Polo/Golf GTi, Golf R,
Scirocco, Audi A4, S3, BMW 1 & 3 Series
